

ECO CCTV TOWER

Robowatch can rapidly install our self-contained Zero Emissions, Eco IP CCTV Tower. This is a fully battery-operated live IP CCTV system – Not a video verification unit.

The Eco IP CCTV Tower is designed to provide you live CCTV coverage where power isn't available.

Using its in house designed, smart battery management system the tower is capable of powering three live IP, CCTV cameras, with 40m analytic detection & a 115dB PA warning speaker for weeks on end.

Using 4g connectivity the system transmits live footage to our CAT II registered, in house 24/7 manned control room.

Utilise our Eco Tower on: Construction Sites, Satellite Compounds, Warehouses, Residential Projects, Rail Highways, Excavations.

Robowatch have been the market leader in CCTV security since 1998. Armed with our state of the art IP CCTV surveillance systems, our systems pick up any unwanted intruders and immediately transmit live footage to our control room where our alarm receiving operatives will take the appropriate actions.
